Cold chain: Dangerous: Regulated:

General information

- For measuring the brachial circumference of children aged 6 months to 5 years (height 65cm to 109.5cm if age is unknown)
- Enables rapid screening of acute malnutrition, which carries a high risk of mortality
- Used for initial evaluation, nutritional surveys and detection within a particular community

Specifications

Material: Plastic, PVC
Specifications: PVC, 0.5mm thickness, flexible, not stretchable, washable
Graduations of 2mm (accuracy 1 mm)
Amband which can be threaded into itself, enabling the brachial circumference to be read directly through a hole in the middle

Packaging: Unit presentation:
The following information must appear on the packaging:
- designation of item
- name and address of supplier (manufacturer)

Other requirements: Should conform to ISO standard
